

# The Big Stone Gap Post.

THURSDAY, MAY 3, 1900.

PUBLISHED EVERY THURSDAY BY

GILBERT N. KNIGHT,

EDITOR AND PUBLISHER.

Phone 25.

Entered according to postal regulations at the post-office at Big Stone Gap as second-class matter.

ONE YEAR, \$1.00  
SIX MONTHS, .50  
THREE MONTHS, .25

## RATES OF ADVERTISING.

	12 mos	6 mos	3 mos
1 column	\$100.00	\$60.00	\$35.00
2 column	75.00	40.00	25.00
3 column	50.00	25.00	15.00
4 column	25.00	15.00	8.00
5 column	15.00	8.50	5.00

The above rates are for standing advertisements only.

LOCAL ADVERTISEMENTS will be charged at the rate of 5 cents per line for each insertion.

The man who drinks can easily find many diseases for which whiskey is supposed to be a cure.

It is said that the British government expenditure is running now \$7,000,000 a week beyond revenue.

The population of Europe is 381,000,000 as against 302,000,000 in 1870. This is an annual increase of 2,630,000. So says a German authority.

The State Department has been informed that the Ottawa government has given notice of an increase of 20 to 40 cents per cord on the first of this month of the duties on pulp wood.

Nails have dropped one dollar on the keg and wire one cent on the pound in the market. It is thought that the drop is only temporary and that the price will rise again in a very short time.

It has been formally announced that the United States Agricultural Department has selected the Albert Lea Creamery of Freeborn Co., Minn., to furnish butter for the American Exhibition at the Paris Exposition.

Efforts are to be made by the Grand Army of the Republic to secure legislation providing for the creation of a pension court of appeals, which is to pass finally on all applications for pensions rejected by the Pension Office and Interior Department. There are 13,000 cases which have been rejected by the Interior Department, and these in addition to others that arise from time to time, will be referred to the new court.

The Pan-American conference, which will meet next year at the City of Mexico will consider the establishment of a permanent international court of arbitration for claims of citizens of one American nation against another. When a claim of this kind is presented it is seldom settled upon any just or equitable basis, the amount of damages collected usually depend upon the influence of the claimant with his government and the power of that government to enforce its demands.

AMERICAN freedom of thought or action was never intended to be construed into license. Yet, so far as our marriage laws are concerned, that is precisely the direction in which freedom is tending, says the *Ladies Home Journal*. We are horrified at the thought of free love; we go into spasms of virtuous indignation over free divorce; we frown down mightily upon Mormonism. And yet we sanction free marriage—absolutely free with everything eliminated; minister, magistrate and license. There's where our sublime inconsistency comes in.

FRIENDS of General Joe Wheeler, of Alabama, and Mrs. George W. Childs, of Philadelphia, are convinced that their engagement will be announced very shortly. Neither of the persons interested will either deny or confirm the report but the manner of each lends abundant confirmation to it. At a luncheon in Philadelphia, attended by Mrs. Childs and the General they were congratulated by mutual friends upon their rumored engagement, and these congratulations were accepted without denial, though General Wheeler now says that they were unfortunate and untimely.

THE Dry Tortugas have been formally turned over to the Navy Department, to be turned into a great naval station. Before the Spanish war, they were held by the Marine Hospital as a quarantine station and were reclaimed by it after the war was over. As they have the only deep and fine harbor for many miles, the navy was loath to give them up and

appealed to the President, who has decided in favor of the Navy. The islands are a veritable stronghold, and will be made more effective by protective works. They will be one of the largest coaling stations in the world, a great deal of money having been expended in contracts for the equipment of the place with the latest appliances for handling fuel.

INSTEAD of trying to cut down the privileges of newspaper transmission at second class rates, it is urged that Congress had better revise the law regulating railway charges. This was adopted in 1878, and since that time, there has been an enormous reduction in the amount that it costs the railroads to handle the mails. For example, where an engine hauled three or four cars then it hauls eight or ten cars now, and where a car carried ten tons of mail then it carries forty tons now. The entire expense of building and equipping mail cars is borne by the railway companies, but they are built according to plans and specifications furnished by the department. The government pays \$5,700 a year rental for each car, although the first cost of construction is less than \$3,000.

SECRETARY GAGE has recommended the establishment of a national Standardizing Bureau, to take the place of the present office of standards, weights and measures. The functions of the bureau are to consist of the custody of standards; the comparison of standards used in scientific inventions, engineering, manufacturing, commerce and educational institutions with the standards adopted or recognized by the government; the construction, when necessary, of standards, their multiples and subdivisions; the testing and calibration of standard measuring apparatus; the solution of problems which arise in connection with standards; the determination of physical constants and the properties of material, when certain such data are of great importance to scientific and manufacturing interests and are not to be obtained with sufficient accuracy elsewhere.

## SNIPS.

Successful and delightful any girl may be, even though she cannot stay all day in the home. If it be her duty to be away, teaching in kindergarten or primary school, writing in an office or selling goods in a shop, she loses not a bit of her true worth in the household through her brave independence and her endeavor to relieve her parents of her support.—*April Ladies Home Journal*.

Tom Brown's secretary and traveling McCormick advertisement, T. W. Hughes, was indicted by the recent grand jury, for setting up a binder on Sunday, against the peace and dignity of the Commonwealth.—*Jonesville Virginian*.

Chicago has two vociferous organizations that are agitating with tongue and pen and pocketbook in behalf of the "liberties" of the Boers and Filipinos. But right under the noses of these farsighted philanthropists, men are daily being set upon, knocked down, maimed and beaten into insensibility for no other offense than that they are trying to support themselves and families by honest labor. These outrages are done in open day, on main thoroughfares almost in the shadow of the mayor's office. The political police is complaisant, and thus far not one of the things has been punished for any of these crimes against human freedom. In the meantime thousands of working men are deprived of their right to work by the brutal force of the lawless mob. The Chicago crusaders for liberty can find work to their hand near South Africa or the Philippines.—*Learning by doing*.

The taking of the 12th United States census will begin on June 1. The enumerators throughout the country are now receiving their commissions and will fit themselves for

# NO USE TRYING

I can't take plain cod-liver oil. Doctor says, try it. He might as well tell me to melt lard or butter and try to take them. It is too rich and will upset the stomach. But you can take milk or cream, so you can take

## Scott's Emulsion

It is like cream; but will feed and nourish when cream will not. Babies and children will thrive and grow fat on it when their ordinary food does not nourish them.

Persons have been known to gain a pound a day when taking an ounce of Scott's Emulsion. It gets the digestive machinery in working order so that the ordinary food is properly digested and assimilated.

# "Out of Sight Out of Mind."

In other months we forget the harsh winds of Spring. But they have their use, as some say, to blow out the bad air accumulated after Winter storms and Spring thaws. There is far more important accumulation of badness in the veins and arteries of humanity, which needs Hood's Sarsaparilla.

This great Spring Medicine cures the blood as nothing else can. It cures scrofula, kidney disease, liver troubles, rheumatism and kindred ailments. Thus it gives perfect health, strength and appetite for months to come.

**Kidneys**—"My kidneys troubled me, and on advice took Hood's Sarsaparilla, which gave prompt relief, better appetite, my sleep refreshing. It cured my wife also." MICHAEL BOYLE, 3473 Denby Street, Pittsburgh, Pa.

**Dyspepsia**—"Complicated with liver and kidney trouble, I suffered for years with dyspepsia, with severe pains. Hood's Sarsaparilla made me strong and hearty." J. B. ENKORT, Main Street, Auburn, Me.

**Hip Disease**—"Five running sores on my hip caused me to use crutches. Was confined to bed every winter. Hood's Sarsaparilla saved my life, as it cured me perfectly. Am strong and well." ANNIE ROBERT, 49 Fourth St., Fall River, Mass.

**Hood's Sarsaparilla**  
Never Disappoints.

The work during the month of May. The time allotted for the whole work is 30 days. In that time every individual of a grand total of 75,000,000 will have responded to 27 to 28 questions. The process of compiling will then go forward, and some of the experts are going to have their heads fuller of figures than at any time in their lives. The law regulating the taking of the census provides, it seems, that in cities of 8,000 and upwards the work shall be completed within fifteen days after it is started.—*Bristol Courier*.

Hon. Harry J. Ayers, of Big Stone Gap, was here this week. Harry is the present representative from Wise, Dickenson and Buchanan Counties. He perhaps, was the youngest representative in the Virginia House of Delegates.—*Gate City Leader*.

Shall we celebrate the Fourth of July at Pennington Gap this year or will we go elsewhere and help others, who have a little get-up about them? We guess you might get a ticket for about half fare. Make up your mind and see which will be the cheapest.—*Pennington Gap News*.

You are all invited to come to Big Stone Gap and celebrate with us.

The New York Sun is authority for the statement that there is a bill before congress which takes away from a citizen, indicted by a federal grand jury in another state, any rights before a committing magistrate. The indictment is considered prima facie evidence of guilt. It has already passed the senate and is now in the judiciary committee of the house. The Sun, the leading republican newspaper of the country, says of it: This new statute repealing as it does our most precious existing safeguards, is the greatest blow at liberty which has been struck within the last half century. It passed the senate in a manner to show that it could not have been understood at all. It is now in the judiciary committee of the house. There let it die, unless it be taken out to be formally killed in sight of all.—*Knoxville Sentinel*.

No man should be allowed to vote in the Kansas City Convention who will not pledge himself in advance to support the ticket nominated and the platform adopted by that convention.—*Greenville (Tenn.) Times*.

**Glorious News**  
Comes from Dr. B. B. Cargile, of Washita, I. T. He writes: "Four bottles of Electric Bitters has cured Mrs. Brewer of scrofula, which had caused her great suffering for years. Terrible sores would break out on her head and face, and the best doctors could give no help; but her cure is complete and her health is excellent. This shows that thousands have proved, that Electric Bitters is the best blood purifier known. It's the supreme remedy for eczema, tetter, salt rheum, ulcers, boils and running sores. It stimulates liver, kidneys and bowels, expels poisons, helps digestion builds up the strength. Only 50 cents. Sold by J. W. Kelly, druggist. Guaranteed."

**Andrew Carnegie's First Investment.**  
It was due to Thomas A. Scott that Andrew Carnegie made his first investment—ten shares of stock in the Adams Express Company, valued at \$500. This he did with considerable trepidation: He had labored hard for the money he had saved up while he had worked as a telegrapher. It is part of railroad history how he later fell in with the inventor of the sleeping car, saw the enormous advantages which that manner of travel held out to passengers and promoters, and how he interested others in the invention of Mr. Woodruff. This occurred shortly after his return from Washington, when the problems of transportation were still upmost in his mind. He was now on the road to success and wealth as he then pictured earthly possessions. The Pennsylvania oil fields yielded large returns when Carnegie with others turned their energies in the direction of the newly discovered territory. In one year land purchased for \$40,000 increased in value so that it paid a dividend of \$1,000,000.—*Review of Reviews*.

# WASHINGTON LETTER.

(From our regular correspondent.)

WASHINGTON, April 30.—Little more important legislation, outside of the regular appropriation bills, need be expected from this session of Congress. This has been plainly indicated on the floor of the Senate, where the power of the minority is not a tradition but an insurmountable fact. This is Presidential year and the minority scent politics in every measure of importance. In other Presidential years, the majority has fought for measures, not to pass them but to emphasize political issues; but this year, the majority seems to regard fighting unnecessary for that purpose and to be anxious to hurry the necessary business through and adjourn. That is the situation today. A single speech on either side may upset all calculations and precipitate a political fight, which may lengthen the session beyond the early June days in which adjournment is now confidently expected.

The House will this week take up and pass the Nicaragua Canal bill, and Senator Morgan is confident that it will pass the Senate, but others are not so confident. It is an open secret in Washington that the administration would, for several reasons prefer that the Senate leave the bill unacted upon at the present session, although it will not go to the extent of openly antagonizing a measure that is so popular, but there are tricks in all trades, and it will be an easy matter for experienced parliamentarians to so manipulate the business of the Senate that the Canal bill will not get to a vote in the Senate, at the present session, without seeming to be seeking to delay that measure.

It is denied by officials of the Department of State that any intimation has been received of objection on the part of Russia or of any other European government, to pressure being exerted by this government to compel the Sultan of Turkey to pay the claims for American Missionary property destroyed by Turks.

There has been much gossip because of the nomination of the President and confirmation by the Senate of Rev. John J. Girmoudi, of Minn., a Catholic priest, to be U. S. Consul at Santos, Brazil. About the only reason for the gossip appears to be that no other Catholic priest has ever been given a place in our consular or diplomatic service. An official connected with the Department of State, said of that phase of the matter: "A U. S. Consul's only duties are commercial, and if Father Girmoudi is the first Catholic priest to be given the position, it is probably only because he is the first one who has applied with support enough to attract the favorable notice of the appointing powers, as the selection of ministers of other denominations to be consuls has been quite common, and no reason exists to my knowledge for discriminating against the Catholic clergy. In this particular case it is probable that American merchants doing business with Brazil, asked for the appointment, believing that it would be good policy to have their commercial interests represented by a Catholic in a country where the influential elements are Catholic." It is the Catholics who are doing the most talking about this appointment, and some of them are predicting that the Church authorities will interfere and prevent Father Girmoudi accepting the position.

The vote of 52 against and 3 for the motion of Senator Pettus, of Ala., to send a resolution declaring Senator Scott, of West Virginia, entitled to his seat, back to the Committee on Elections, with instructions to investigate further, makes it certain that the Senate at present composed fully accept the doctrine that the Senate has no legal right to go behind the election of a Senator by a state legislature. The three dissenters were Morgan and Pettus, of Ala., and Turner, of Washington.

Under the Rules of the Senate, it is impossible to force a vote upon any measure opposed by a determined minority. Senator Jones, of Ark., the leader of the democrats, has publicly stated that the Army reorganization bill, which provides for making Gen. Miles a lieutenant-general, and Gen. Corbin, a major-general, for increasing the Artillery branch of the regular army, and for doubling the number of cadets at the West Point Military Academy, will not be allowed to pass at this session of the Senate. The administration has been pressing this bill for some time, and it was to quiet some of the opposition thereto that the promotion of Gen. Miles, who is not a favorite of the administration, was included therein.

Considerable interest has been displayed in Congressional circles in an official statement of Gen. Wood, showing that 66,869 men in Cuba have registered themselves as citizens of Spain, temporarily residing on the island, in accordance with the clause of the Paris treaty, giving all foreign born residents of Cuba, one-year to decide whether they would retain their allegiance to their mother country, or become citizens of Cuba. It is somewhat surprising to most persons that so many should have chosen to remain subjects of Spain, which will shut them out of any participation in the government of Cuba when our military government is withdrawn.

Mr. Robert Ramsey, Jr., superintendent of the Virginia Coal and Iron Company's mammoth coke plant at Stonewall spent Monday night in the Gap.

**Hood's Pills**  
Rouse the torpid liver, and cure biliousness, sick headache, jaundice, nausea, indigestion, etc. They are invaluable to prevent a cold or break up a fever. Mild, gentle, certain, they are worthy your confidence. Purely vegetable, they can be taken by children or delicate women. Price, 25c. at all medicine dealers or by mail of C. I. Hood & Co., Lowell, Mass.

# SCROFULA The Blighting Disease of Heredity.

In many respects Scrofula and Consumption are alike; they develop from the same general causes, both are hereditary and dependent upon an impure and impoverished blood supply. In consumption the disease fastens itself upon the lungs; in Scrofula the glands of the neck and throat swell and suppurate, causing night sweats, the eyes are inflamed and weak; there is an almost continual discharge from the ears, the limbs ache, and white swelling is frequently a result, causing the diseased bones to work out of the skin, producing indescribable pain and suffering. Cutting away a sore or diseased bone is good; the blood is poisoned. The old scrofulous taint which has probably come down through generations has polluted every drop of blood.

Scrofula requires vigorous, persistent treatment. The blood must be brought back to a condition before the terrible disease can be stopped in its work of destruction. Mercury, and other poisonous minerals usually given in such cases do more harm than good; they run the system and leave the system in a worse condition than before.

S. S. S. is the only medicine that can reach deep-seated blood troubles like Scrofula. It goes down the disease and forces every vestige of poison out of the blood. S. S. S. is the only purely vegetable blood purifier, the roots and herbs from which it is made contain wonderful blood purifying properties, which no poison, however powerful, can resist. S. S. S. stimulates and restores health and strength to the enfeebled body. If you have reason to think you have Scrofula, it is a fatal disease, and you must act at once. S. S.
